

About us

O.K.B Herbal Company established in 2017 with head factory in Long An, Vietnam strictly certified safe by the authorities.

OKB has been building a system of domestically grown regions and linked with medicinal cultivation areas abroad to have a stable, qualified and safe supply of medicinal herbs without destroying the ecology of Vietnam.

Currently, the company has 8 growing regions in the country (Nam Dinh, Thai Binh, Kontum, Phu Yen, Dak Nong, Dong Thap, Can Gio, Binh Thuan) growing medicinal herbs suitable to local climate and environment.

Herbio JSC is a consumer brand company using products made from OKB. The brand has been officially launched in Vietnam market from June 2020.

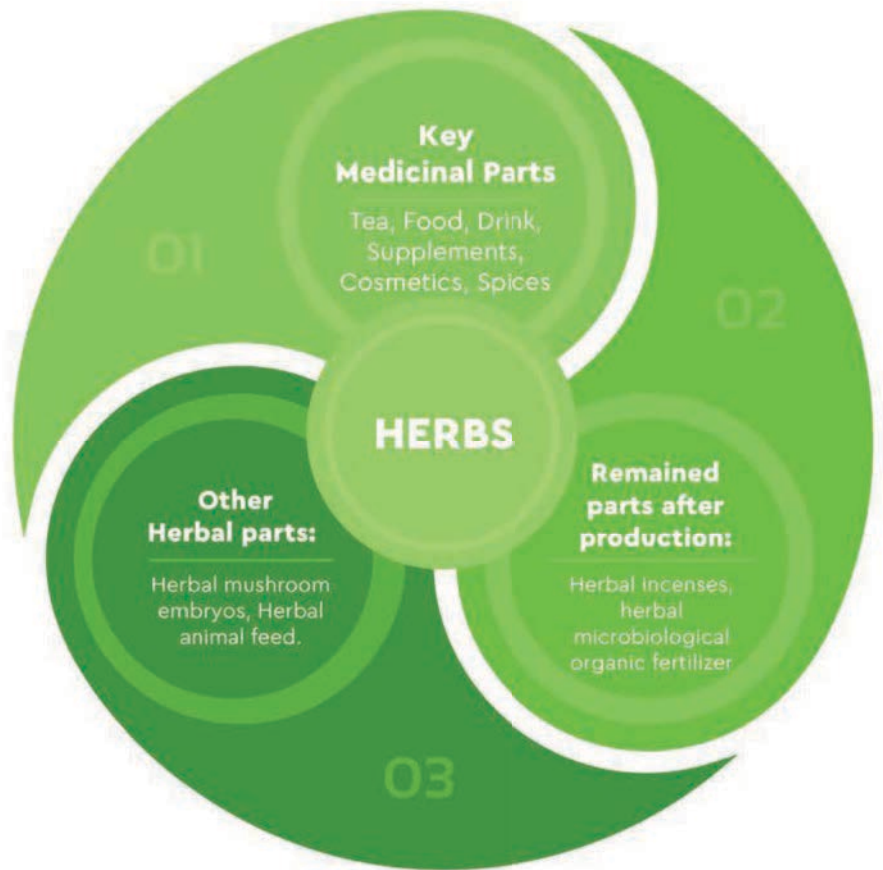

Our vision to future herbal industry

We commit on the vision to bring more values from natural herbs into daily life: from alternative consuming products like food, beverage, tea, supplements, health care to futuristic environmental-friendly packaging, clothing or even construction materials.

Our research & production teams have excellent experience in **pharmaceutical manufacturing**, allowing us to enhance Vietnam's rich Eastern herbal knowledge with **scientific and modern production practice**. Every herbal parts, every production method are careful crafted to deliver the **best use of their quality**.

We also apply environment-friendly manufacturing by utilizing all herbal parts during production:

- ♥ Key medicinal parts are used for herbal tea, drinks, foods, supplements, cosmetics, spices.
- ♥ Remained parts and other herbal parts are used or re-used for herbal incenses, herbal microbiological organic fertilizer or to grow herbal mushrooms at our farms.

Our factory and farms currently have GSP, GDP, GACP-WHO, Food Safety Certification and FDA Registration. Halal, USDA, GMP to be certificated in 2021.

Our core values

Herbal Insight

Herbal knowledge from both Eastern and Western practices to research and develop the best use of herbs.

Scientific Approach

Apply international pharmaceutical industry standard in research, testing, manufacturing and quality control.

Farms & Ingredients

Develop our own local herbal farms and connect with global ingredients partners.

Manufacturing chains

Master production lines to utilize all herbal parts into different health-care products.

HERBAL MUSHROOM

Using parts of variable herbs to create **mushroom substrates** and harvest multiple types of herbal grow mushrooms.

Higher nutrition values.

Better smell, better taste.

Add-on medicinal values.

Please contact us for further request on herbal mushrooms information.

-  Edible Mushrooms (all common types).
-  Medicinal Mushrooms (Rare species).
-  Foods from Mushrooms (Sauces, Spices, Pasta, Snacks, Supplements, Extracts).
-  Materials from Mushrooms (Leather, Packaging, Construction materials).

The first herbal mushrooms substrates farm in Vietnam using solar energy for a sustainable growing system.

Our mushrooms farms model operates under an eco-friendly system: solar energy to supply mushroom houses' cooling and moisturizing system, while substrates wastes are reused as organic compost for surrounding herbal plants.
